

About the comp.

[home](#) » About the comp.

The **PK SERVIS** Company was established in 1993 specialising in repairs and servicing of SCHWING STETTER concrete pumps. The subsequently established division was concerned with wholesale and retail of Schwing spare parts and also bearings, belts, seals and other technical commodities.

The **PK SERVIS** Company has resided in a newly established business-administrative complex since April 2001, which includes warehouses, a mechanical workshop with a 5-ton crane track and office space with a shop. At this time we are capable of satisfying even the most demanding customer requirements.

We are currently the supplier of a whole range of components and module systems for construction of single-purpose machinery, using the know-how of the MEGADYNE, REXROTH BOSCH GROUP, INA-FAG, Chevron, Chiaravalli etc. companies. We offer extensive experience in the field of sales and technical consultancy concerning linear guide rails, timing belts and belt-pulleys, bearings, seals and other products from the ranges of world renowned manufacturers.

..." Most of what we are capable of and use today, will be useless in five years time. You will never imagine what we will be capable of and use in five years time. Most people around us will be making their living in another field in five years time. Maybe somewhere else. You will never recall most of the cares you have today. The same applies to certainties. If you understand technologies, you don't understand the world. If you don't understand the world, you will probably lose. Otherwise you have a chance. Maybe a great one"...
